

LDA2Net: Digging under the surface of COVID-19 topics in literature

Topic 91 companion sheet

G. Minello

C.R.M.A. Santagiustina

M. Warglien

This file contains the following supplementary information for Topic 91 of the manuscript “*LDA2Net*: Digging under the surface of COVID-19 topics in scientific literature”:

- Human label and automatic n-gram label proposals (Table 1)
- Summary measures (Table 2)
- Network of top 25 bigrams (Figure 1)
- Wordclouds of top 25 words by node relevance measure (Figure 2)
- Wordclouds of top 25 bigrams by edge relevance measure (Figure 3)
- Filtered (0.99 percentile) topic network (Figure 4)

Table 1: Human and automatic label proposals. Automatic label candidate for largest word community of the topic. In parenthesis: absolute frequency of the walk out of a sample of size 1000.

Human label	2-gram label	3-gram label	4-gram label
respiratory failure	patients->severe (28.7%)	patients->severe->forms (1.4%)	patients->local->contestation->different (0.8%)

Here follows the set of topic-specific measures that have been used to classify the topic and to analyse its structural properties (see manuscript for details):

Table 2: Summary measures

	JSD	Mean propensity	Variance propensity	Modularity	Barrat Clustering Coeff.
value	0.604044	0.008431	0.000552	0.184387	0.591830
rank	40	73	96	103	79

Based on the aforementioned measures, Topic 91 has been classified as a SPECIALIZED topic.

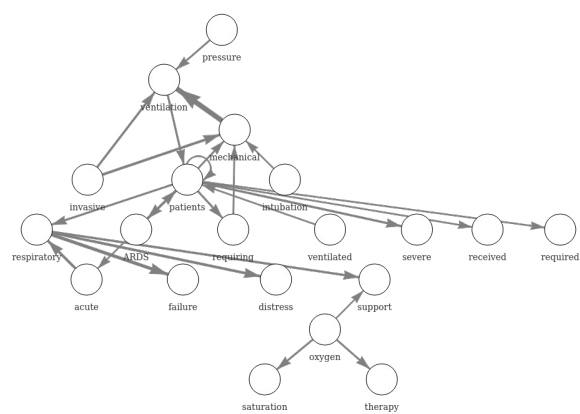

Figure 1: Network of top 25 bigrams (i.e., edges) by weight.

A word cloud of terms related to mechanical ventilation. The most prominent words are 'ventilation', 'patients', 'ARDS', 'oxygen', 'pressure', 'mechanical', 'respiratory', 'ventilator', 'support', 'intubation', 'required', 'severe', 'lung', 'saturation', 'distress', 'therapy', 'pneumonia', 'prone', 'critically', 'failure', 'invasive', 'requiring', 'extracorporeal', and 'patient'. The words are arranged in a circular pattern, with 'ventilation' and 'patients' being the largest and most central.

A word cloud of terms related to mechanical ventilation. The most prominent words are 'mechanical' and 'ventilation'. Other significant words include 'respiratory', 'patients', 'ARDS', 'pneumonia', 'oxygen', 'required', 'support', 'failure', 'membrane', 'ventilated', 'prone', 'care', 'acute', 'severe', 'oxygenation', 'therapy', 'invasive', 'distress', 'saturation', 'pressure', 'intubation', 'received', and 'requiring'. The words are arranged in a circular pattern, with 'mechanical' and 'ventilation' at the top.
